TEST SIGN-OFF DOCUMENT

Project name	**DemoBlaze Project**
Application	**https://demoblaze.com/index.html**
Test summary report date	**22-04-2026**
Testing Type	**Automation Testing (Selenium + TestNG)**
Browser Compatibility	**Chrome,Firefox**
Prepared By	**Priyanka**

1. INRTODUCTION

This document serves as the formal test sign-off for the Demoblaze e-commerce application. It confirms the completion of all planned testing activities, including functional, UI, and automation testing. The document summarizes the testing results, defect status, and overall quality assessment of the application based on defined exit criteria.

---

2. OBJECTIVES

- Ensure all critical modules of the Demoblaze website are functioning correctly.
- Validate end-to-end workflows (Login → Cart → Purchase)
- Assess defect status and application stability.
- Provide stakeholders with confidence regarding release readiness

---

3. MODULE TESTED

S. No	MODULE	STATUS
1	Login	Passed
2	Sign up	Passed
3	Logout	Passed
4	Home	Passed
5	Contact	Passed
6	About us	Passed
7	Product Category	Passed
8	Product Details	Passed
9	Shopping Cart	Passed
10	Place order	Passed

---

4. TEST SUMMARY

Test Type	Total	Passed	Failed
Functional Testing	81	75	6
UI/UX Testing	34	32	2
Data-Driven Testing	3	3	0
Negative Testing	17	5	12

---

5. DEFECT SUMMARY

Severity	No. of Defects	Status (Closed/Open)
Critical	2	Open
Major	13	Open
Minor	13	Open
Trivial	3	Open
Total	31	Closed = 0 , Open = 31

---

6. EXIT CRITERIA STATUS

EXIT CRITERIA	STATUS
All planned test cases executed.	✓ Met
No critical defects open	✗ Not Met
Test summary report completed.	✓ Met

---

7. PENDING

- Critical and major defects pending resolution.
- Medium and minor issues deferred to next release

---

8. APPROVALS

Role	Name	Signature	Date
QA Testers	Priyanka.VR		22-04-2026
Project manager			
Business Analyst			
Product Owner			

---

9. CONCLUSION

The Demoblaze application has undergone comprehensive testing across all major modules. While core functionalities are working in most scenarios, a significant number of defects, including critical and major issues, remain unresolved.

Therefore, the application demonstrates moderate stability but does not meet production-quality standards at this stage.
